### **DETAILED ACTION**

1. This office correspondence is response to the applicant's after response filed on 08/13/2008.

### **Allowable Subject Matter**

3. Claims 1-9, 11-15, and 17 are allowed. The following is an examiner's statement of reasons for allowance: In interpreting the claims, in light of the Specification and the applicant's amendments filed on 08/13/2008, the Examiner finds the claimed invention to be patentably distinct from the prior art of record.

4. Van (US patent publication 20020090090) is concerned with "distributing first decryption information to the subset of the population of digital receivers, wherein the first decryption information allows for potentially decrypting a plurality of programs coextensively in time, and the unauthorized digital receivers are cryptographically excluded from using the first decryption information; encrypting first content using a first method using a content encryption key; distributing the first content".

5. Jovanovich (US patent 5703950) is concerned with "receiving provisioning information from a subset of the population of digital receivers indicating that the subset is potentially within range to receive digital television from the broadcaster.

6. However the totality of each element and/or step in claims 1, and 12 are not alluded to in the combined art of Van and Jovanovich. Their teachings either individually or in combination failed to teach or suggest the method recited in claim 1. More specifically, the combination of Van and Jovanovich does not teach or suggest "encrypting the content encryption key using the first decryption information, the first

decryption information being generated using the provisioning information, the provisioning information including a unique serial number associated with each digital receiver" as recited in claim 1. Similarly, the combination of Van and Jovanovich does not teach or suggest "distributing the content encryption key to the subset of the population of digital receivers using a second decryption information, wherein the second decryption information is cryptographically secured with the first decryption information" as recited in claim 1. Accordingly, claim 1, and 12 is allowable over the combination of Van and Jovanovich. So, Claims 1-9, 11-15, and 17 are allowable by virtue of their dependency upon claim 1, and 12 and also due to additional limitations recited in these claims. Therefore, for the foregoing reasons, examiner withdraws of the rejection of claims 1-9, 11-15, and 17 under 35 USC §103(a) as being obvious over Van in view of Jovanovich.

6. However, the prior art of record fails to teach or suggest some of the steps of the present claim invention. Examiner performed an updated search and unable to find any prior art to disclose all the steps mentioned in the independent claims.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **Conclusion**

9. Claims 1-9, 11-15, and 17 are patentable.

Art Unit: 2136

10. Claims 10, 16, and 18-31 are cancelled.
